Full-Stack Engineer | Blockchain | JavaScript | AI

EXPERIENCE

[Vendorbay | Full-Stack Engineer](#)

Dec 2025 - PRESENT

B2B Procure-to-Pay (P2P) SaaS Platform for Supply Chain & Enterprise Procurement

- Designed and scaled backend services powering supplier onboarding, product catalog, and procurement workflows using **Node.js, TypeScript, and PostgreSQL**.
- Built robust **GraphQL and REST APIs** with advanced filtering, pagination, and aggregation for large enterprise datasets.
- Improved API response time and system reliability using **Redis caching and query optimization**.
- Contributed end-to-end features across stack using **React.js and Next.js**, ensuring seamless UI-backend integration.
- Containerized services using **Docker** and deployed scalable workloads on **AWS infrastructure**.
- Integrated **RAG-based AI workflows and agentic systems** to enhance intelligent product search and data retrieval automation.

Tech-stack - Reactjs, NextJs, Node.js, TypeScript, PostgreSQL, Redis, GraphQL, Docker, AWS, Agentic AI, RAG

[Tata Consultancy Services \(TCS\) | Backend Developer](#)

Aug 2024 - Dec 2025

(TCS) — A global IT services company delivering scalable enterprise solutions in BFSI and automation domains.

- Led migration of legacy **VB.NET + PL/SQL** system to modern **Node.js, Express, React, PostgreSQL** stack.
- Re-architected database schema and optimized queries, improving performance by ~25%.
- Built secure **JWT-based REST APIs** and modernized frontend with **React + Tailwind**.
- Collaborated in agile teams delivering enterprise BFSI solutions.

Tech-stack - Node.js, Express, React, PostgreSQL, Tailwind, Azure

OTHER EXPERIENCES

- **Freelance Full-Stack Engineer (2022–24):** Delivered 5+ SaaS & web apps end-to-end.
- **Co-Lead, GDSC GCOEA:** Mentored developers; led hackathons & workshops.
- **Convener, Prajwalan 2023:** Managed technical fest of 10,000+ participants.
- **Built 5+ DApps** using Solidity & Polygon.

SKILLS

Languages: JavaScript, Python, C++ , Java

Front-end: React.js, Redux, SCSS, Tailwind, Next.js, React Native

Cloud: AWS (EC2, VPC, Subnets, SGs, EKS, ECS, S3, Route53, CloudWatch), Azure

CI/CD: Jenkins, GitHub Actions

Back-end: Node.js, Express.js, Fast API

Databases: MongoDB, MySQL, Firebase, PostgreSQL, Redis, Elasticsearch, GraphQL

AI: GenAI, Langchain, OpenAI, Streamlit, Ollama, Google ADK, CrewAI

Web3 - Truffle, Hardhat, IPFS, Ganache, NFT

UX/UI Design: Figma, Framer

Others: Web Scraping, Content Creation, Git, Agile, Debugging, Testing, Coding, Data Structures, Algorithms, Automation

Projects

Muzzy — Music Streaming Platform | [GitHub](#) | [Live](#)

Enables real-time collaborative music streaming with synchronized playback across users.

- Built real-time collaborative music streaming with synchronized playback.
- Implemented **Redis caching + WebSockets + HLS**, reducing latency by ~68%.
- Designed scalable backend + optimized data flows for smoother playback.

Stack- AWS EKS, Terraform, Node.js, Next.js, PostgreSQL, Redis, Docker

EDUCATION

Government College of Engineering Amravati

July 2020 - June 2024
